

Robot	Purpose of the robot	Evaluation (Good/ Bad)
1. Pancake Bot	The Pancake Bot is the world's first 3D food printer capable of printing pancakes by automatically dispensing batter directly onto a griddle in a design of the user's choosing. Designs for printing can be created with the free easy to use downloadable software and then loaded to the Pancake Bot 2.0 via and included SD card.	Good
2. AIBO: Robot Dog	Aibo is a Robotic puppy, powered by AI. Aibo is a friendly robotic dog whose personality and behavior evolves over time. It can recognize its owner's face, detect smiles and words of praise, and learn new tricks. And of course, it loves to be petted.	Good
3. A Self-Driving Car	A self-driving car, also known as an autonomous car, is a car that is capable of traveling without human input. Self-driving cars are responsible for perceiving the environment, monitoring important systems, and control, including navigation.	Good
4. Leonardo	Leonardo is one of the most sophisticated social robots ever built. It is designed to be expressive and communicative, and its AI system allows it to learn from natural interactions with people.	Good
5. Nao Robot Doctor	Nao is a small humanoid robot designed to interact with people. It's packed with sensors (and characters) and it can walk, dance, speak, and recognize faces and objects. Now in its sixth generation, it is used in research, education, and healthcare all over the world.	Good
